PROFILE

Second year Software Engineering student at Ulster University with full stack projects across the MERN ecosystem, Python, and Java, plus Forage simulations covering Kafka, API development, and database design (JPMorganChase, Citi, Walmart). Delivered solo freelance work for two paying clients fast learning, proactive, ready to contribute from day one

SKILLS

Python: Pandas, NumPy, Data Preprocessing, Data Structures, Data Science

Web Fundamentals: HTML, CSS, JavaScript, Bootstrap, JSON, PHP

SQL: Data Definition Language, Data Manipulation Language, Data Query Language, Data Control Language, SQL Database Administration, Database Management Systems (DBMS)

Maya: 3-D animation creation and editing

Java: Object Oriented Programming, JUnit

Artificial Intelligence: Machine Learning, Data Preprocessing, Clustering, Natural Language Processing, Deep Learning, TensorFlow

Full Stack Development: MERN, ReactJS, Node.js, RESTful API, ExpressJS, MongoDB, NoSQL, CRUD, Axios, React Router DOM, TailwindCSS, Framer Motion, Lucide React, Jest, Version Control (Git)

Kali Linux: Basic Linux commands, Package management, Network scanning, Traffic analysis, Wireshark

Systems & Architecture: Software Architecture, UML, Database Design (ERD), Message Queue (Kafka), API Development, Systems Design, Build Tools

EDUCATION

09/2024 – 07/2028 United Kingdom, Belfast	Ulster University, BEng-Software Engineering Object Oriented Programming(2:1), Client Side Development(2:1), Intro to Physical Computing(1), Problem Solving for Computing(2:2), Innovation and Society(2:1)
04/2016 – 04/2024 United Arab Emirates, Dubai	Springdales School Dubai, High School CBSE Curriculum: Business Studies, Entrepreneurship, Informatics Practices, English, Animation(85.6%)

PROFESSIONAL EXPERIENCE

10/2023 – 10/2023 Dubai	Springdales School Dubai, Special Needs Supporter - Assisted students with special needs in English and Computer Science through patient, simplified guidance. - Provided personalised support that led to improved comprehension and confidence in learning outcomes.
05/2023 – 05/2023 Dubai	Springdales School Dubai, Student Coordinator - Engineered a multifaceted event engaging 70 students of determination through dance, show and tell, and painting workshops. - Coordinated activities that achieved 100% participation and positive staff feedback.
08/2025 – 09/2025 Dubai	Pick2Read , Web Site Developer - Executed a paid contract to modernize the platform, initially making a dynamic, animated interface using React.js and Node.js. - Refactored the frontend into vanilla HTML, CSS, and JavaScript to ensure seamless integration with the client's existing PHP backend for final delivery.

ACADAMIC PROJECTS

03/2025 – 03/2025
Belfast, United Kingdom

Pets Clinic, (Java, OOP)

- Created a pet management system allowing add, search, update, and delete operations for pet records.
- Implemented inheritance to classify dogs and cats by breed and color.
- Improved usability by enabling report generation, validated with 30+ test cases covering CRUD operations.

PERSONAL PROJECTS

02/2026 – 05/2026

Petrospectrum, (React, Vite, TypeScript, Node.js, Express)

- Delivered a full stack website for a real oil and gas company, building a React/Vite/TypeScript frontend paired with a Node.js/Express backend.
- Designed and built the site with responsive layouts, matching live TSX components to real company content across pages.
- Connected frontend and CMS backend, resolving data mismatches in the content-fetching hook to ensure live components rendered accurate, upto date content.

05/2025 – 05/2025

JavaBites, (Java, OOP)

- Designed and implemented a restaurant ordering system with account registration, login, menu browsing, bill payment, and a customer loyalty program, enhancing customer retention and satisfaction.
- Applied OOP principles to manage menus, customers, and orders efficiently, validated through 20+ ordering and billing tests.

07/2025 – 08/2025

Golden Spoon, (React, Node.js, MongoDB, Tailwind, Bootstrap)

- Developed a restaurant website with user registration, login, and interactive menu with basket functionality.
- Integrated multiple payment options with persistent storage.
- Delivered a clean, responsive interface, tested across 3 device types and 5 major browsers for accessibility.

08/2025 – 09/2025

Pick2Read, (React, Node.js, Express, Tailwind CSS, Bootstrap → HTML, CSS, JavaScript, Tailwind CSS, Bootstrap)

- Built a responsive website using React, Node.js, Tailwind, and Bootstrap, later converted to HTML/CSS/JS for easier deployment.
- Validated usability and performance across devices and browsers, ensuring smooth navigation and consistent load times.

09/2025 – 12/2025

Chat.AI

- Built a modular Python chatbot using NLP and machine learning to deliver intent recognition, contextual conversations, adaptive responses, and personalized user experiences
- Integrated user authentication, external APIs, and in chat utilities, using a scalable multi file architecture aligned with real world software design practices
